ONE in SEVEN
One person in seven suffers from one or more NTDs
What are we doing to help them?

We are working with partners to:
• Increase availability of existing treatments and vaccines
• Strengthen health systems by equipping hospitals, providing medicines and supporting provision of safe water and sanitation
• Train healthcare professionals and researchers on care delivery and R&D using creative tools and technologies
• Raise awareness on diseases, prevention, and needed science-based regulatory policies

Doing our part:
Implementation of capacity building efforts

40 health partnerships combining prevention, training and treatment

Check out http://partnerships.ifpma.org for insights into each partnership.
