**Our Diverse Partners**

Ethically, individually and as members of innovative pharmaceutical companies, we collaborate with global and local governments, non-governmental organizations in the development of innovative solutions, make contributions to the achievement of the Sustainable Development Goals (SDGs) and engage with civil society to provide support across a range of health and development-related challenges. By working together, we can achieve our goals more effectively and efficiently.

Our collaborations are multi-company programs, where competitors put aside their differences to collectively develop solutions that benefit patients.

We believe that, by sharing experiences and learning from one another, our actions will have a greater impact and scale up our work. We work in collaboration with global and local governments, innovative pharmaceutical companies, universities, research institutes, foundations, non-governmental organizations, and others to address important global health issues.

Thirty-nine of our programs are multi-company programs, where competitors put aside their differences to collectively develop solutions that benefit patients. By working together, we can achieve our goals more effectively and efficiently.

We believe that, by sharing experiences and learning from one another, our actions will have a greater impact and scale up our work. We work in collaboration with global and local governments, innovative pharmaceutical companies, universities, research institutes, foundations, non-governmental organizations, and others to address important global health issues.

We work with...: The World Health Organization (WHO), UNICEF, World Bank, Global Fund to Fight AIDS, Tuberculosis and Malaria (GFATM), UN Foundation, Bill and Melinda Gates Foundation, International Initiative for the Development of Novel Medicines (IIDD), Medecins Sans Frontieres (MSF), GAVI, The Vaccine Alliance (GAVI), and more.

**Diseases and Populations We Target**

Our collaborations address over 80 different diseases and are tailored to the specific needs and existing system infrastructures. To ensure our efforts are effective, we focus on low and middle-income countries, where a high proportion of the world’s population resides. Our collaborations work in areas where health services are incomplete or unavailable, and where local ownership and capacity exist.

**Our Global Reach**

Innovative pharmaceutical companies collaborate...: 250+ companies from 27 countries collaborate across the globe.

**Our Contribution to the SDGs Reaches Beyond Health**

The innovative pharmaceutical industry is an essential contributor to the global health sector, and we are committed to making a significant contribution to the achievement of the Sustainable Development Goals (SDGs). By focusing on areas where we can make the most impact, we can help to address some of the world’s most pressing health challenges.

By working together, we can achieve our goals more effectively and efficiently. By sharing experiences and learning from one another, our actions will have a greater impact and scale up our work. We work in collaboration with global and local governments, innovative pharmaceutical companies, universities, research institutes, foundations, non-governmental organizations, and others to address important global health issues.

**Addressing Environment-Related SDGs**

Innovative pharmaceutical companies are actively engaging in efforts to address the environmental challenges posed by climate change and its impacts. In addition to reducing our own carbon footprint, we are committed to reducing the environmental impact of our products and operations. We are working to develop sustainable solutions and to promote responsible manufacturing practices.

By working together, we can achieve our goals more effectively and efficiently. By sharing experiences and learning from one another, our actions will have a greater impact and scale up our work. We work in collaboration with global and local governments, innovative pharmaceutical companies, universities, research institutes, foundations, non-governmental organizations, and others to address important global health issues.

**Collaborating to Achieve Universal Health Coverage**

Together, innovative pharmaceutical companies are committed to mitigating the health challenges of climate change, however, we are also actively working to address other environmental-related SDGs, including SDG 13 on climate action. We are committed to reducing our carbon footprint and to promoting sustainable solutions for addressing the environmental challenges posed by climate change.

By working together, we can achieve our goals more effectively and efficiently. By sharing experiences and learning from one another, our actions will have a greater impact and scale up our work. We work in collaboration with global and local governments, innovative pharmaceutical companies, universities, research institutes, foundations, non-governmental organizations, and others to address important global health issues.
