UNIVERSAL HEALTH COVERAGE (UHC) is at the heart of the health-related sustainable development goals (SDGs) and key to improving the lives of billions in Africa. It promotes health and well-being, reduces poverty and supports economic growth. Achieving UHC means ensuring that all individuals and families can obtain the health services they need without suffering financial hardship. The innovative pharmaceutical industry’s activities have long been aligned with universal health coverage (UHC). Many member companies have also been active in the UHC2030 action agenda. Given Africa’s population is growing and still predominantly affects African countries, the pharmaceutical industry is committed to partnering across sectors and stakeholders to address Africa’s health needs.

The private sector is an essential partner in reaching Africa’s health goals, particularly in low- and middle-income countries whose health systems are under-equipped and under-resourced. From product development to care delivery, innovative pharmaceutical companies are working to improve access to health care and enhancing the continent’s ability to strengthen and safeguard health systems.
